BERG Junior Trailer

The BERG Junior trailer has been especially designed for even more fun with your Buddy! Connect it to your Buddy and transport anything you want from A to B and back. We know from experience: Kids love it!

A towbar is included in each carton, which adults can easily mount to the trailer. The BERG Junior Trailer fits behind any of the BERG Buddy go-karts (with the exception of the Ferrari 150 Italia).

The smallest children can easily attach or detach the BERG Junior Trailer themselves.

The trailer is designed in black colour, to match every Buddy model! Besides that, the trailer is equipped with air tyres and ball bearings, which ensures smooth and light riding, whether the trailer is empty or full. The frame is made of powdercoated steel. The plastic trailer prevents it from rusting or suffering paint damage.
